Cell Aging is Controllable with QRS

As we age the ability of cells to maintain a high cell voltage naturally begins to decrease. An aging or unhealthy person will have difficulty restoring energy to weak cells with a low cell voltage. Optimal cell voltage is between -100 and -70mV. As the cell voltage decreases, the risk of disease increases substantially.

With low cell voltage good nutrition, vitamins, minerals and medication are not absorbed as well, and therefore wasted. Cancer cells usually have a cell voltage below -20mV.

The QRS restores proper cell voltage by recharging the cells in the body back to their optimal charge of -90mV, dramatically reducing pain, normalizing cell physiology and improving health. This allows the body to recover its own self-healing capabilities.

The QRS increases cell membrane potential, which vitalizes cell metabolism. This improves the cell's ability to function. The improved electric cell voltage provides a higher “osmotic push” for the assimilation of minerals and nutrients into the cell. At the same time the circulation of the blood in the tissues is increased providing thirsty cells with more oxygen. **QRS has imitated this principle of Nature in an ingenious way.**

“Healing is not an Event, it's a Lifestyle” — Katja Gwynn

Dr. Fischer originally invented the QRS to save his own life following a stroke. It was then applied to space travel, because humans can not survive in outer space without the Earth's electro-magnetic field known as the Schumann Resonance.

The QRS simulates Earth's own natural healing frequencies. All manned space vehicles incorporate PEMF technology. The longest consecutive Space Flight record on the MIR Space Station is held by Valeri Polyakov, having lived in outer space for 437 days— well over a year— with built-in QRS technology on board.

The QRS was discovered to have a phenomenal range of healing properties for all of us here on Earth. Thousands of research papers have been published in Europe, Russia and Australia on this 30+ year old technology. Due to its regenerative properties, the QRS is invaluable for restoring human health, maintaining bone density, joint health, proper circulation and vigorous metabolism.

Now we all can use the QRS to help us be the very best that we can be! **The QRS is safe enough for the whole family in-home use, and yet effective enough for therapeutic professional use.**

QRS QUANTUM RESONANCE SYSTEM

The Premier Original PEMF, Pulsed Electro-Magnetic Frequency device for **PAIN CONTROL & HEALING**

From the MIR Space Station to the MARS Space Program, from the NBA to the Olympics, from the Vatican Hospital to the prestigious Medical Clinics and International Anti-Aging Spas, the **Quantum Resonance System, QRS**, is the premier PEMF of choice. And while required by Astronauts, it is preferred by Hospitals, Professional Athletes, Healthcare Practitioners, Clinics and Spas.

“When I met Sir Dr. Fischer in 1997 and he explained the basis of his QRS therapy to me, I understood that a scientific breakthrough had happened here.” —Prof. Habil, PhD, Eng. Founder of Technical University in Chemnitz, Germany

"Just wanted to let you know that I went the entire day without a single pain pill. That is a 16 year record for me! I am so grateful to have the QRS." —Louis, 72, former door gunner Vietnam vet, shot down 3 times, suffered chronic back pain ★

"My first experience on the QRS mat brought tears to my eyes. Lumbar pain I've had for 18 years... GONE, along with the pain pills." —Ken C, 67, Idaho, RF Engineer, veteran, U.S. Department of Navy: Iraq, Kuwait, Afghanistan ★

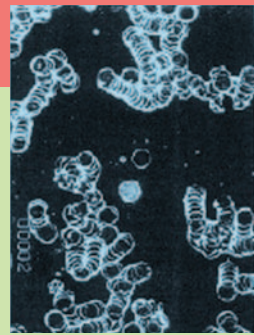

"Before QRS I suffered fibromyalgia pain 24/7. The QRS eliminates my pain and gave me my life back." —Bob T, 69, Special Forces disabled veteran ★

DARK FIELD MICROSCOPY OF THE BLOOD

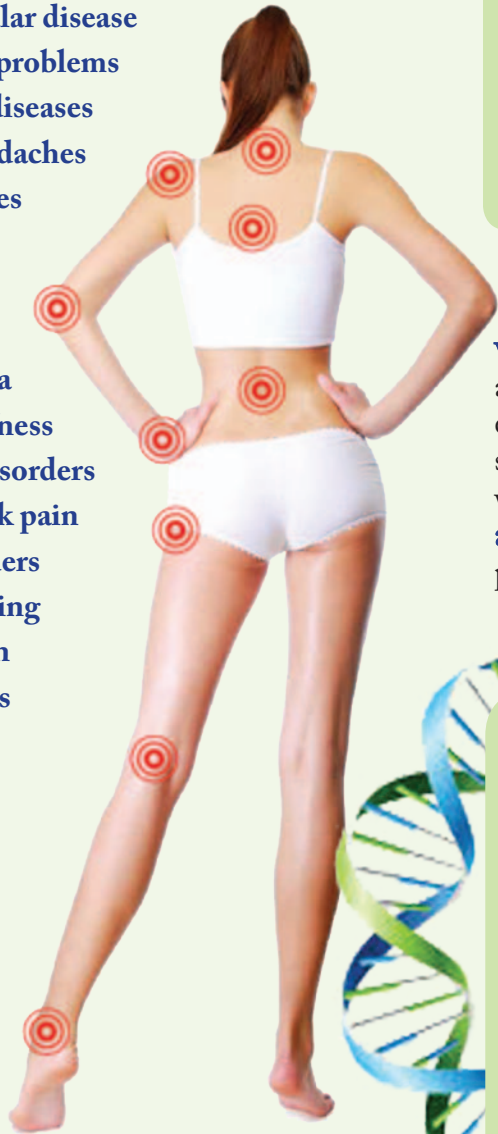

Cells Clumping Before Treatment

Cells Moving Freely 15 min. After Treatment

Doctors in Europe and Australia are using the QRS to effectively treat the following:

- cardiovascular disease
- circulation problems
- rheumatic diseases
- tension headaches
- broken bones
- stroke
- bedsores
- migraines
- fibromyalgia
- muscle stiffness
- muscular disorders
- chronic back pain
- sleep disorders
- wound healing
- chronic pain
- osteoporosis
- joint pain
- implants
- ulcers
- asthma
- arthritis
- fatigue
- stress
- diabetes
- neuropathy
- enlarged prostate

Only QRS frequencies accelerate ion transport — they open the cells to vitamins, minerals and oxygen,

as well as expel waste. The process enables optimal cell replacement, so the body remains healthy and vibrant. This means rejuvenation, for **a longer, healthier and active life**, made possible with QRS quantum resonance technology.

Made in Germany

Nature's Healing Harmonics

Only QRS has Fibonacci in its Patented Technology

The QRS e-function (exponential) waveform is a soft-curl fibonacci shape at the top of each power pulse. This e-function waveform only works with the cell's specific amplitude window, and is the secret to the unlocking principle in the cell walls to begin the osmotic ionic transfer of nutrients in and waste out. This is called the "Resonance Phenomenon" that initiates the "Ion Transport." QRS has two worldwide patents in relation to this unique and proprietary feature.

The exclusive blend of electro-magnetic frequencies that make up a QRS e-function waveform satisfies all the frequencies of the body cells from 0.1 hertz to 1,000 hertz, but do not contain the frequencies in the range of 50 to 60 Hz, which is protection from electrosmog (interfering EMF fields). This is an additional QRS worldwide patent. Gauss meters that measure electrosmog will show no change in power by measuring a QRS signal, because the **QRS is the only PEMF (Pulsed Electro-Magnetic Frequency) system that has this internationally patented built-in "Electrosmog Neutralizer."**
